

# 194CR-25L-220V

## Electrically Heated Flowmeter Regulator for CO<sub>2</sub>

**Model 194CR-25L-220V Electrically-Heated Flowmeter Regulator for CO<sub>2</sub> is designed for applications requiring high gas flow rates, up to 60 SCFH without freezing.**

### FEATURES/CONSTRUCTION

- single stage regulator, with 2" gauge and 191FM flowmeter
- Regulator is preset at 50 psi
- Thermostatically-controlled built-in electric heater keeps the CO<sub>2</sub> warm and provides continuous duty cycle without freezing
- 36/110/220VAC /190W heater is standard
- Voltage output will vary in some locations.
- Please specify your voltage requirements when ordering
- Flowmeter is backpressure compensated to ensure accurate reading when line restrictions are present
- Forged brass body with chrome plated, and chrome plated aluminum housing cap
- Sintered bronze inlet filter
- Dimension: 160mm x 180mm x 170mm
- Weight: 2.0kg

**CAUTION: Use this regulator only with non-siphoned standard CO<sub>2</sub> cylinders.**
