

RT-1000

Rust Zero RT-1000 (RUST CONVERTER/ High-Molecular Rust Converter)

Packaging Unit • 500g Spray
: • 18l/ PVC

Features

- One-solution type special macromolecular compound.
- This product converts existing rusts into stable iron-adhered material(black membrane) and absorbs free oxide present in the steel surface to prevent steel corrosion.
- This is a perfect low-pollution rust converting rust-proofing paint.
- Semi-permanent rustproofing
- Perfect rust conversion
- Direct painting on rust not requiring pretreatment
- Easy-to-use

Uses

- Maintenance of various steel matters.
- Rustproofing or maintenance of steel tanks used in the factory related with medicine, food, textiles and chemicals.
- Rustproofing or maintenance of piping or inner structures.
- For painting in the places where oil paints can not be used due to the danger of fire or explosion.
- For painting in the places where oil paints can not be used due to the moisture remained in the adhered agent in the harbor or dam.
- Rustproofing painting or maintenance of vessel-related steel structure, steel structure of construction material, steel structure of foundry.
