

### **Product Data Sheet**

 Provides good resistance to metal-to-metal abrasion, fire cracking, and corrosion common frequently encountered in steel mill rolls.

Allows for productive component build-up with minimal risk of costly

## Tube-Alloy® A250-S

### Features:

- Specially formulated modified 420 stainless steel deposit
- Provides high deposition rates with crack and porosity-free deposits

#### **Applications:**

Continuous caster rolls

Table rolls

rework

**Benefits:** 

٠

#### Wire Characteristics:

 $\label{eq:Wire Type: Composite (cored) submerged arc hardfacing wire} \textbf{Wire Type: Composite (cored) submerged arc hardfacing wire}$ 

**RECOMMENDED FLUXES: HF-N** 

TYPE OF CURRENT: Direct Current Electrode Positive (DCEP)

Standard Diameters: 3.2 mm (1/8")

RE-DRYING: Not recommended

STORAGE: Product should be stored in a dry, enclosed environment and in its original intact packaging.

| Typical Deposit Chemistry* (Undiluted): |      |      |      |       |      |  |  |  |  |
|---|------|------|------|-------|------|--|--|--|--|
| W/ Flux                                 | % C  | % Mn | % Si | % Cr  | % Fe |  |  |  |  |

#### Deposit Characteristics:

DEPOSIT MICROSTRUCTURE: Martensitic

MAXIMUM DEPOSIT THICKNESS: Unlimited

MACHINABILITY: Fair when using carbide tools

CUTTING: Cannot be oxy-fuel cut

SLIGHTLY MAGNETIC

• Maintaining a proper welding procedure - including pre-heat and interpass temperatures - may be critical depending on the type and thickness of steel being welded.

• See Above: Parameters are provided for informational purposes only. All values are approximate. The optimal amperage, voltage, and travel speed may vary depending on the material thickness, joint design, and other variables specific to the application. Likewise, actual deposition rate may vary depending on contact tip to work distance used.

**TECHNICAL QUESTIONS?** For technical support of Hobart Filler Metals products, contact the Applications Engineering department by phone toll-free at +1 (800) 532-2618 or by e-mail at Applications.Engineering@hobartbrothers.com

#### \* DISCLAIMER:

The information contained or otherwise referenced herein is for reference purposes only and is presented only as "typical." Typical data are those obtained when welding and testing are performed in accordance with AWS specification(s) and/or standard industry practices. Other tests and procedures may produce difference results and typical data should not be assumed to yield similar results in a particular application or weldment. No data is to be constructed as a recommendation for any welding condition or technique not controlled by Hobart Brothers Company. Hobart Brothers Company does not assume responsibility for any results obtained by persons over whose methods it has no control. It is the user's responsibility to determine the suitability of any products or methods mentioned herein for a particular purpose.
